

WEES INGELIG OOR WATERKWALITEIT

Die Departement van Water & Sanitasie (DWS) beveel aan dat munisipaliteite van tyd tot tyd inligting ten opsigte van die gehalte van drinkwater publiseer.

Waterkwaliteit word teenoor die Suid-Afrikaanse Nasionale Standaard (SANS) se kode 0241 vir drinkwater gemeet.

Op die tabel hiernaas is die resultate vir die tydperk van Junie 2026 tot September 2026 se waterkwaliteit-metings vir Overstrand se nege water-aanlegte. Watermonsters word maandeliks deur 'n geakkrediteerde laboratoria geneem waar verskillende bakteriologiese, chemiese en fisiese parameters gemeet word.

Daaruit blyk dit dat ons waterkwaliteit van hoogstaande gehalte is, met 100% van die gemiddelde resultate wat aan die Suid-Afrikaanse Nasionale Standaard (SANS) se kode 0241 vir drinkwater voldoen.

In gevalle waar die toetsresultate van die finale drinkwater nie voldoen aan SANS 0241 nie, word daar regstellings by die watersuiweringsaanleg en in die water netwerk gedoen. Die finale drinkwater word dan weer getoets om te verseker dat alle parameters wel aan SANS 0241 voldoen.

WATER QUALITY AT MUNICIPAL WATER SCHEMES

The Department of Water & Sanitation (DWS) recommends that municipalities periodically publish information on the quality of drinking water supplied to consumers.

Water quality is measured against Code 0241 as set by the South African National Standards (SANS) for drinking water.

On the accompanying drinking water quality table the average scores attained by Overstrand Municipality's nine water treatment plants from June 2026 to September 2026 can be seen. Water samples are collected monthly by an accredited laboratory where different bacteriological, chemical and physical parameters are measured.

Overstrand Municipality's water quality is of an outstanding quality, with 100% of the average results complying with Code 0241 as set by the South African National Standards (SANS) for drinking water.

When the drinking water quality does not comply with SANS 0241, corrections are made at the water purification works and in the reticulation network if applicable. The drinking water quality is then retested against the SANS 0241 limits for compliance.

UMGANGATHO WAMANZI KWIZIKIM ZIKAMASIPALA

ISebe lezaManzi noGutyulo (DWS) licebisa ukuba oomasipala bapapashe ngamaxesha athile ulwazi ngomgangatho wamanzi okusela abawanikezela kubathengi.

Umgangatho wamanzi ulinganiswa ngokwemigangatho ye-SANS 0241, njengoko imiselwe yi-South African National Standards (SANS) yamanzi okusela.

Kwitheyibhile yomgangatho wamanzi okusela ehamba nolu xwebhu, kuboniswa umndilili weziphumo zomgangatho wamanzi ofunyenwe kwiziko ngalinye kula alithoba ococo lwamanzi kaMasipala waseOverstrand, ukususela ngoJuni 2026 ukuya kuSeptemba 2026. Iisampulu zamanzi zithathwa qho ngenyanga yilebhu evunyiweyo, apho kuvavanywa iiparamitha ezahlukeneyo zebhaktheriya, zekhemikhali nezomzimba.

Umgangatho wamanzi kaMasipala waseOverstrand ubalasele kakhulu, njengoko umndilili weziphumo zovavanyo ezili-100% uthobela iimfuno ze-SANS 0241 ezimiselwe yi-South African National Standards (SANS) zamanzi okusela.

Xa umgangatho wamanzi okusela ungahambelani neemfuno ze-SANS 0241, kwenziwa izilungiso kumaziko ococo lwamanzi nakuthungelwano lwemibhobho yokuhambisa amanzi, apho kuyimfuneko. Emva koko, amanzi aphinda avavanywe ngokwemida ebekwe yi-SANS 0241 ukuze kuqinisekise ukuba ayahambelana na neemfuno zomgangatho wamanzi okusela.
