

WEES INGELIG OOR WATERKWALITEIT

Die Departement van Water & Sanitasie (DWS) beveel aan dat munisipaliteite van tyd tot tyd inligting ten opsigte van die gehalte van drinkwater publiseer.

Waterkwaliteit word teenoor die Suid-Afrikaanse Nasionale Standaard (SANS) se kode 0241 vir drinkwater gemeet.

Op die tabel hiernaas is die resultate vir die tydperk van November 2024 tot September 2025 se waterkwaliteit-metings vir Overstrand se nege water-aanlegte. Watermonsters word maandeliks deur 'n geakkrediteerde laboratoria geneem waar verskillende bakteriologiese, chemiese en fisiese parameters gemeet word.

Daaruit blyk dit dat ons waterkwaliteit van hoogstaande gehalte is, met 100% van die gemiddelde resultate wat aan die Suid-Afrikaanse Nasionale Standaard (SANS) se kode 0241 vir drinkwater voldoen.

In gevalle waar die toetsresultate van die finale drinkwater nie voldoen aan SANS 0241 nie, word daar regstellings by die watersuiweringsaanleg en in die water netwerk gedoen. Die finale drinkwater word dan weer getoets om te verseker dat alle parameters wel aan SANS 0241 voldoen.

WATER QUALITY AT MUNICIPAL WATER SCHEMES

The Department of Water & Sanitation (DWS) recommends that municipalities periodically publish information on the quality of drinking water supplied to consumers.

Water quality is measured against Code 0241 as set by the South African National Standards (SANS) for drinking water.

On the accompanying drinking water quality table the average scores attained by Overstrand Municipality's nine water treatment plants from November 2024 to September 2024 can be seen. Water samples are collected monthly by an accredited laboratory where different bacteriological, chemical and physical parameters are measured.

Overstrand Municipality's water quality is of an outstanding quality, with 100% of the average results complying with Code 0241 as set by the South African National Standards (SANS) for drinking water.

When the drinking water quality does not comply with SANS 0241, corrections are made at the water purification works and in the reticulation network if applicable. The drinking water quality is then retested against the SANS 0241 limits for compliance.

UMGANGATHO WAMANZI KWIZIKIM ZIKAMASIPALA

Isebe laManzi noCoceko (DWS) liyancoma ukuba oomasipala bapapashe amaxesha ngamaxesha ulwazi ngomgangatho wamanzi okusela abawabonelela abathengi.

Umgangatho wamanzi umlinganiselwa ngokwe Khowudi 0241, njengoko ibekwe yiMigangatho kaZwelonke yaseMzantsi Afrika (SANS) yamanzi okusela.

Kwithayibhile yomgangatho wamanzi okusela ehamba nolu xwebhu kubonakala umdibaniso wamanqaku aphakathi afezwe ngamaziko alithoba okucoceka amanzi oMasipala waseOverstrand ukusukela ngoNovemba 2024 ukuya kuSeptemba 2024.

Iisampulu zamanzi ziqokelelwa rhoqo ngenyanga kwilabhoratri eqinisekisiweyo, apho kuvavanywa khona iimpawu zebhaktheriya, ezekhemikhali nezomzimba.

Umgangatho wamanzi oMasipala waseOverstrand uphezulu kakhulu, kwaye i-100% yeziphumo zomndilili zihambelana neKhowudi 0241 njengoko ibekwe yiMigangatho kaZwelonke yaseMzantsi Afrika (SANS) yamanzi okusela.

Xa umgangatho wamanzi okusela unghambelani neSANS 0241, kulungiswa oko kwiziko locociso-manzi nakwi nethiwekhi yokuhambisa amanzi ukuba kuyimfuneko.

Emva koko, umgangatho wamanzi uphinda uvavanywe ngokwemida ye SANS 0241 ukuze kuqinisekise ukuthotyelwa kwemigangatho.
