(Applicable to all
WWTW's except
Hermanus)

WASTE WATER EFFLUENT QUALITY AT MUNICIPAL SCHEMES

The Department of Water & Sanitation (DWS) recommends that municipalities periodically publish information on the quality of drinking water supplied to consumers as well as final waste water effluent quality results.

Waste water effluent quality is measured against standards as set by DWS, which are classified as either General Standards, or Special Standards.

The table for waste water effluent quality illustrates Overstrand Municipality's average effluent quality parameter measurements at the six treatment plants over the past six months. Samples are taken for analysis on a monthly basis by accredited laboratories.

Overstrand Municipality's final waste water effluent quality complies 82% overall.

When the final effluent quality does not comply with the General Standards, corrections are made at the treatment works. The final effluent quality is then re-tested against the General Standards for compliance.

GEHALTE VAN BEHANDELDE RIOOLWATER-UITVLOEISEL

Die Departement van Water & Sanitasie (DWS) beveel aan dat munisipaliteite van tyd tot tyd inligting ten opsigte van die gehalte van die uitvloeisel van hul rioolsuiweringswerke publiseer.

Die gehalte van die finale rioletwerke-uitvloeisel word gemeet teen standaarde wat deur DWS gestel word, welke standaarde as of Algemene Standaarde of Spesiale Standaarde geklassifiseer word.

Die tabel hierbo illustreer die gemiddelde metings by Munisipaliteit Overstrand se ses suiweringsaanlegte teenoor parameters wat vir die gehalte van uitvloeisel gestel word oor die afgelope ses maande, vergeleke met die DWS se Standaarde. Monsters word op 'n maandelikse basis vir ontleding deur geakkrediteerde laboratoria geneem.

In Munisipaliteit Overstrand voldoen die gehalte van die finale uitvloeisel van vuilwater in 82% van die gevalle.

In gevalle waar die toets resultate van die finale uitvloeiselmonster nie voldoen aan die standaard nie, word daar regstellings by die werke gedoen. Die afloopwater word dan weer getoets om te verseker dat alle parameters aan die standaard voldoen.

UMGANGATHO WAMANZI KWIZIKIM ZIKAMASIPALA

ISebe leZamanzi (DWA) lindulula ukuba amaxesha ngamaxhesa oomasipala mabazazie iinkcukacha zomgangatho wamanzi okusela abonelela ngawo abantu nomgangatho wamanzi amdaka.

Amanzi amdaka axilongwa ngokwamanqanaba abekwe nguDWA, achazwa njenge-General Standards, okanye i-Special Standards.

Itheyibhuli yokunyangwa kwamanzi amdaka ibonakalisa umndilili womgangatho wamanzi nezhikhokelo kumaziko ama-6 kaMasipala weOverstrand kwiinyanga ezi-6. Kuthayathwa amanzana athunyelwe kumaziko okuxilonga amanzi abhalisiweyo.

Umgangatho wamanzi kaMasipala weOverstrand uhambelana neGeneral Standard kuma-82% omndilili wemilinganiso.

Xa amanzi okugqibela engahambelani neGeneral Standards, kulungiswa kumaziko onyango-manzi. Aphinda axilongwe kujongwe ukuba ayahambelana na neGeneral Standards. Itheyibhuli yala manzi iquka onke amanzana axilongiweyo, kuquka nalawo ebengahambelanaga neGeneral Standards.
